## **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 25, 2005 has been entered.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. That subject matter is the recitation of "the carbon of said monolithic porous carbon structure is not bound to silica". This is new matter as the examiner has read the entire specification again and cannot find anything that would support that quoted language. While the examples are all directed to the use of organic materials, there is nothing to support that the porous carbon structure formed from such organic materials "is not bound to silica". Accordingly, such quoted language (new matter) must be canceled from these claims.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 10/760,083

Art Unit: 1724

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 4. Claims 20-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 20 is indefinite because when the term "such as" is being used, it is not known whether the board recitation of "gases" or the more specific recitation of "air" is necessary to meet this claim. Claims 21-29 are indefinite because they depend from the above indefinite claim 20.
- 5. When the new matter is canceled, the claims will be identical to those rejected by the examiner in the March 9, 2005 Office action and such rejection is repeated below.
- 6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 7. Claims 10-29 (without the new matter) are again rejected under 35 U.S.C. 102(b) as being clearly anticipated by both the filter element and the filter apparatus containing such filter element of WO99/62616.
- 8. Applicant's arguments filed July 25, 2005 have been fully considered but they are not persuasive. All of those remarks deal with the added language to claims 10 and 20 of "the carbon of said monolithic porous carbon structure is not bound to silica". As pointed out above, the examiner cannot find any language within the as-filed specification to support that language. As to the remark that the reference used against the claims does not show a monolithic structure, page 3, lines 20-22 of such reference clearly states that "The structure is monolithic, i.e. it is in a single piece, not granular and not composed of particles bound together by binder etc., it is in the form of a

Application/Control Number: 10/760,083

Art Unit: 1724

coherent solid structure". Clearly, then the filter element is a monolithic structure. The examiner did not make up such statement. Any other remarks made by applicants and not specifically commented upon by the examiner have been considered.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571) 272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-4:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
